

## **Notification of Low-Level Flying over Regional District of Fraser-Fort George**

Talon Helicopters with LaSen Inc. is planning to perform low-level flyovers for FortisBC between April 26<sup>th</sup> and June 15<sup>th</sup>, 2024, during daylight hours, as authorized by Transport Canada.

This work is part of FortisBC's annual inspection of its high-pressure transmission natural gas lines and is an important part of FortisBC's integrity management program. The low-flying helicopter uses LaSen's aerial LiDAR detection technology to inspect the pipelines. This technology is used to detect any issues to ensure FortisBC's system continues to operate safely, reliably and to plan maintenance activities accordingly.

The Regional District of Fraser-Fort George is one of 23 regional districts in BC that we will pass through during this time – the flight time over a single area will be minimal. There will be no activity on the ground related to flights. The flight schedule may vary depending on weather conditions and wildfires.

Maps of the relevant work zones are attached for your reference. The areas to be inspected include:

- Mackenzie
- City of Prince George

For more information on this inspection work, call **1-888-224-2710** or visit [fortisbc.com/communityupgrades](https://fortisbc.com/communityupgrades) or Talon Helicopters at 604-214-3585

***Please confirm receipt of this notification by email reply.*** Feel free to forward this notice to anyone who may be interested.
